

Bobbiti Harshavardhan Reddy

Application Developer | Java Spring boot | Micro Services | Location: Bengaluru, Karnataka

+91 8309681995 | harshabobbiti626@gmail.com | [Portfolio](#) | [LinkedInProfileURL](#)

PROFESSIONAL SUMMARY

Backend Developer with 2+ years of expertise in designing, building, and deploying scalable web applications. Strong command over front-end application architectures using ReactJS, JavaScript and TypeScript, combined with robust backend engineering experience using NodeJS (Express), Core Java, and Microservices. Adept at implementing secure RESTful APIs, managing complex RDBMS databases, and implementing automated CI/CD pipelines.

CORE COMPETENCIES

- **Front-End Ecosystem:** ReactJS, JavaScript, TypeScript, React Hooks, Context API, Redux Toolkit, Component Optimization
- **Back-End Frameworks:** Core Java, Spring Boot, Spring Data JPA, Hibernate, Microservices Architecture, Node.js(Next), RESTful APIs
- **Data & Security Ecosystem:** MySQL, PostgreSQL, RDBMS Optimization, Database Indexing, Redis Caching, JWT, RBAC
- **DevOps & Build Tools:** Docker, Kubernetes, Jenkins, Maven, Git, GitHub, Linux, Azure AI foundry, AWS Cloud Services
- **Code Quality & Testing:** SonarQube, ESLint, Unit Testing, Jest, JUnit 5, Mockito, Selenium WebDriver, Postman
- **Methodologies:** Agile (Scrum), Sprint Planning, Stakeholder Communication, Technical Documentation, DSA, OOPS and Problem Solving
- **AI Productivity Tools:** GitHub Copilot, Cursor AI, ChatGPT, Claude AI

EXPERIENCE

Capgemini | Software Engineer (Backend) - Nuuday Telecom

Bengaluru, Karnataka | Apr 2025 – Present

- Developed the backend module for our Agentic Gallery that handles how AI prompts are evaluated, versioned, and optimized. Used Java and Spring Boot to build a clean multi-threaded pipeline, which made text processing much faster and cut down latency when sending data to the LLMs
- Safeguarded all the complex prompt logic by writing a deep testing suite using JUnit and Mockito. Set up SonarQube gates in our pipeline to automatically flag things like memory leaks and thread safety, ensuring we consistently hit our 90% code coverage mark.

- Handled the DevOps work for the module by containerizing it with Docker and setting up automated builds using Jenkins and Maven. I also took ownership of the API documentation, making it easy for the frontend and AI teams to plugin.

Bhrish Labs | UI Developer (HR Requisition Platform) – Nestle Partner

Hyderabad, Telangana | July 2024 – Mar 2025

- Refactored the code into a modular structure based on Atomic Design Principles (Atoms, Molecules, Organisms) to reduce codebase length by 30%.
- Developed reusable, multi-step requisition wizard forms using ReactJS and TypeScript, eliminating redundant component declarations by managing complex UI states with custom React Hooks and the Context API.
- Optimized large-scale data grids and candidate tables by implementing client-side pagination, debounced search features, and lazy loading to drastically cut down DOM rendering bottlenecks.

PROJECTS

Real-Time Server Health Dashboard (Front-End Focused)

- The Problem: Fragmented server metrics and high dashboard latency caused by unoptimized React components rendering messy, redundant layout code.
- The Solution: Built a single-page dashboard using ReactJS with Atomic Design that cut code bloat and used the Context API to block unnecessary screen re-renders.

High-Volume URL Shortener Engine (Back-End Focused)

- The Problem: Downstream database crashes and performance lag caused by thousands of concurrent users hitting the relational database simultaneously
- The Solution: Built a secure microservices engine with Java, Spring Boot and PostgreSQL wrapped in a Redis caching layer, which completely offloaded database traffic and safely authenticated routes via JWT.

EDUCATION

B.Tech – Computer Science & Business Systems (9.2 GPA) | 2020–2024

SRM Institute of Science and Technology, Chennai, Tamil Nadu

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate – *Coursera*
- Java Spring Boot Microservices 5-in-1 (Spring Boot, Cloud, Docker, K8s) – *Udemy*
- Kubernetes Certified Application Developer (CKAD) – *KodeKloud*
